DETAILED ACTION

This correspondence is in Reply to communication filed on 02/11/2004.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

If two or more independent and distinct inventions are claimed in one application, the Director may require the application to be restricted to one of the inventions.

The application includes claims directed to different embodiments or species

That could fall within the scope of a generic claim, restriction between the species may be proper because the species are independent or distinct.

Two distinct groups have been identified

- I. Independent claims 1, 4, 19, 20, 21, 22, 23, 26, and their dependencies are drawn to a method and a system device for controlling network congestion with means for receiving, characterizing and sending data in a Fibre Channel.
- II. Independent claim 11 and its dependencies are drawn to a method for traffic flow between two nodes through an intermediate node in a Fibre Channel.

The search and examination of all the claims in the application on the merits require serious burden on the examiner as the application include claims directed to two independent or distinct inventions as specified.
